SIZE OF CAR ......................................................... 132 x 100 x 82 cm
AVERAGE BATTERY LIFE ....................................... 300 Charges
ABOUT THIS MANUAL: This Manual was written to help you and your child get the most performance, comfort, enjoyment and safety when riding your new electric ride-on toy. It is important for you to understand your new electric ride-on toy. By reading this manual before you let your child go out on his/her first ride, you will know how to get the most from your new electric ride-on toy. It is also important that you or your child’s first ride be in a controlled environment, away from cars, obstacles, and other riders.

⚠️ GENERAL WARNING: Riding an electric ride-on toy can be a dangerous activity, even under the best of circumstances. Proper maintenance of your new ride-on toy is your responsibility and helps reduce the risk of injury. Certain conditions may cause components to fail without fault of the manufacturer. The ride-on toy can and is intended to move, and it is therefore possible to lose control, fall off and/or get into dangerous situations that no amount of care, instruction or expertise can eliminate. If such a thing does occur, your child can become seriously injured or die, even when using safety equipment and other safety precautions.

⚠️ WARNING: To reduce risk of injury, adult supervision is required. Never use in roadways, near motor vehicles, on or near steep inclines or steps, swimming pools or other bodies of water; always wear shoes, and never allow more than two (2) riders.

⚠️ WARNING: CHOKING HAZARD – Small parts not suitable for children under 3 years old.

RIDE AT YOUR OWN RISK AND ALWAYS USE COMMON SENSE.
This manual contains many warnings and cautions concerning the consequences of failing to inspect, maintain or properly use your electric ride-on toy. Because any fall can result in serious injury or even death, we do not repeat the warning of possible serious injury or death each time such a possibility is mentioned in this manual or the risk of falling leads to a warning.

ALWAYS USE PROPER RIDING ATTIRE.
Always wear appropriate clothing and shoes. Never ride barefoot or in sandals and make sure that shoelaces or other fasteners are tied and kept away from the wheels and drive system of the ride-on toy.
RIDERS MUST NOT EXCEED THE WEIGHT LIMIT OF 130 LB (59 KG) AND
MUST BE OVER 3 YEARS OLD. NEVER MORE THAN 2 CHILDREN TO RIDE
THE VEHICLE SIMULTANEOUSLY.

The age grade for the electric ride-on toy is for 3 years and older. Just because your child is within the age and weight limitations specified for the electric ride-on toy, does not mean that his/her size is appropriate to fit or maintain control of the electric ride-on toy, or that he/she is capable of safely operating the electric ride-on toy. You are the best judge of whether you or your child can safely operate the electric ride-on toy; this includes determining whether your child is at the appropriate developmental stage for safe use of the electric ride-on toy. Any rider that is unable to fit comfortably on the electric ride-on toy should never attempt to ride it. A parent's decision to allow their child to use the electric ride-on toy should be based on the child's maturity, skill and their ability to follow rules. Remember that the electric ride-on toy is intended for use only by children who are, at a minimum, able to comfortably and safely operate it.

Children operating the electric ride-on toy should be supervised by an adult at all times. Parents should ensure that children only use the electric ride-on toy safely and within their age and physical limits.

This manual contains very important safety information. It is your responsibility to completely review this information and make sure that all riders understand all of the warnings, cautions, instructions and safety topics addressed in this manual and to assure that all riders are able to safely and responsibly use the electric ride-on toy. You should periodically review and reinforce all information in this manual with all riders, especially children. You should also regularly inspect and maintain your electric ride-on toy to ensure the safety of all riders. Make sure that your new electric ride-on toy is properly fitted to any child riding it; that it is in good repair and safe operating condition; that you and your child have gone over the use, operation and safety information in this manual; that you and your child have learned and understand what to do and what not to do with your new electric ride-on toy, including observing all applicable laws, rules and common sense.

Children should be made aware of all possible riding hazards and correct riding behavior before they ride the electric ride-on toy and should be supervised by an adult at all times. Please explain the following to them as often as necessary.
SAFE RIDING PRACTICES AND WARNINGS

- Check and obey all local laws or regulations which may be in effect in the locations where the electric ride-on toy may be used.
- Always wear appropriate clothing and shoes.
- Observe the age and weight limitations on the cover of this manual.
- Always stay seated while riding the electric ride-on toy. To stop you must take your foot off the foot pedal.
- Children must be supervised by an adult at all times to be safe.
- Always be alert and ride your electric ride-on toy defensively. Watch out for obstacles that could catch one of the electric ride-on toy’s wheels or force you to turn suddenly and/or lose control. Be careful to avoid pedestrians, persons using other wheeled products (including roller or in-line skates, skateboards, scooters, bikes, etc.), children or animals who may enter your path. Always respect the rights and property of others.
- Do not activate the foot pedal unless you are seated in the vehicle and in a safe, outdoor environment that is suitable for riding your electric ride-on toy.
- Do not attempt or perform any stunts or tricks on the electric ride-on toy. It is not made to withstand such misuse and abuse.
- Keep both hands on the steering wheel at all times.
- Do not touch the motor on the electric ride-on toy when in use or directly after use as these parts can become extremely hot.
- Never allow more than two persons to ride the electric ride-on toy at one time and never try to tow anything.
- Do not use near steps, water, or swimming pools.
- Do not ride in wet weather.
- Never immerse the electric ride-on toy in water; electrical and drive components could be damaged by water or create other potentially unsafe conditions.
- Keep your fingers and other body parts away from the motor, steering system, wheels and all other moving components.
- Never hitch onto another vehicle or let yourself be pulled or pull anyone or anything while riding the electric ride-on toy.
- Ride only on smooth, flat, dry surfaces such as pavement or level ground without loose debris, such as sand, leaves, rocks or gravel. Water, mud, ice, bumpy, un-even, slick, or rough surfaces could impair traction and contribute to possible loss of control.
- Do not ride on or near hills or steep inclines. Ride only on level ground to avoid tip over.
- Avoid sharp turns, bumps, drainage grates, and other obstacles.
- Do not ride at night or where there is limited visibility.
- Do not ride indoors or on surfaces that could become damaged such as carpet or flooring.
- Do not ride on streets, around cars, or in foot or vehicle traffic.
- Regularly check the electric ride-on toy and its components. If any parts are broken or worn, do not ride the electric ride-on toy until you have fixed or replaced the broken or worn parts.
• Do not allow hands, feet, hair, body parts, clothing, or similar articles to come in contact with wheels or other moving parts.
• Before each cycle of operation, you must perform the preoperation checks specified in this manual or by the manufacturer, including:
  – That all guards and pads originally supplied by the manufacturer are in proper place and in serviceable condition;
  – That the area that the unit is to be operated in is safe and suitable for safe operation; and
  – That all safety labels are in place and understood by everyone, including the riders.
• Avoid sharp bumps, drainage grates, and sudden surface changes.

PRE-RIDE SAFETY CHECKLIST

• Check to make sure that all components are properly secured and are functioning according to the manufacturer’s specifications.
• Components must be maintained and repaired and only with the manufacturer’s authorized replacement parts. Installation should be performed only by adult, qualified personnel.

USING THE CHARGER

The charger should be examined regularly for damage to the cord, plug, enclosure and other parts. In the event such damage has occurred, the electric ride-on toy should not be charged until the charger has been repaired by qualified personnel or replaced. Use only the supplied, recommended charger.
• Always use caution when charging.
• The charger is not a toy and should be operated by an adult.
• Never operate the charger near flammable materials or liquids, and operate the charger in well-ventilated areas.
• Disconnect the charger and unplug it from the electric ride-on toy when not in use.
• Do not exceed the recommended charging time.
• Always disconnect the charger from the electric ride-on toy prior to wiping down or cleaning the electric ride-on toy with any liquid.

⚠️ WARNING: Never modify or alter the electrical system. Risk of fire. Do not bypass the fuse. Replace only with 3A fuse, located under the dashboard. Alterations could cause a fire or explosion resulting in serious injury or death and could also ruin the electrical system.

FAILURE TO HEED THE WARNINGS LISTED ABOVE INCREASES RISK OF POTENTIALLY SERIOUS INJURY. USE THE APPROPRIATE CAUTION WHEN RIDING AND ALWAYS WEAR APPROPRIATE CLOTHING AND SHOES.
BEFORE YOU BEGIN ASSEMBLY

⚠️ WARNING:
Remove all packing and items from the display box. Make sure that the power switch is turned "OFF" before assembling the electric ride-on toy.

ESTIMATED ASSEMBLY TIME
You should allow approximately 40 minutes for assembly, not including initial charging time. Initial charging can take approximately 18 hours. (See page 14-15 for charging information.)

⚠️ WARNING: DO NOT USE NON-ORIGINAL OR NON-RECOMMENDED PRODUCTS WITH YOUR ELECTRIC RIDE-ON TOY.
Altering of the original components or use of non-recommended replacement parts may or may not be compatible with the design and will void the warranty and may cause an unsafe condition resulting in serious injury or death.

If you experience a problem with this product, or are missing a part, please call us at 1-800-288-1560, rather than return this product to the store.
Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
PARTS DIAGRAM

NOTE: Some parts shown are assembled on both sides of vehicle.

1. Plastic Body Assembly x 1
2. M5x40 Machine Screw x1
3. Steering Wheel x 1
4. M5 Nut x 1
5. Windshield x 1
6. Rear View Mirror x 2
7. 4x12 Round Head Screw x 14
8. M5x12 Machine Screw x 2
9. Seat x 1
10. Rear Fog-light Rack Assembly x 1
11. Rear Fog-light Rack Support x 1
12. 4x12 Flat Head Screw x 8
13. Motor Hood x 2
14. Rear Axle x 1
15. Gear Box x 2
16. Rear Wheel x 2
17. Ø12 Washer x 6
18. M10 Lock Nut x 4
19. Axle Cap x 4
20. Front Wheel x 2
21. Tail Light x 2
22. Front Axle Assembly x 1
23. Ø10 Washer x 2
24. Steering Column x 1
25. Split Pin x 1
26. Charger x 1
27. Socket Wrench x 2
28. Battery (12V 10AH) x 1
ASSEMBLY

Your new vehicle requires adult assembly. Please set aside around 40 minutes for assembly. Please identify all parts before assembly and save all packaging material until assembly is completed to ensure that no parts are discarded.

TOOLS REQUIRED:

- Phillips Screwdriver (not included)
- Needle-nose pliers (not included)
- 17mm Socket Wrench (included)

⚠️ WARNING: Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. In the unassembled state, this package contains small parts. Adult assembly is required; children should not handle parts, or help in assembly of the vehicle.

1. FRONT WHEEL AXLE ASSEMBLY

- Turn the vehicle body upside down.
- Fit the front axle assembly to the vehicle body as shown. Then use a screwdriver to tighten four 4x12 round head screws on each side to secure the front axle assembly.

**NOTE:** The steering column tab must face forward.
2. FRONT WHEEL ASSEMBLY
- Remove all parts from the front axle.
- Fit a Ø12 washer onto the axle.
- Slide the wheel onto the axle.
- Install another Ø12 washer and M10 locknut onto the axle, then tighten with the 17 mm socket wrench.
  **NOTE:** Do not over-tighten. Front wheel should spin freely. If it doesn’t, loosen the nut slightly.
- Press the axle cap onto the locknut.
- Repeat the above operation for the front wheel on the other side.

3. REAR AXLE ASSEMBLY
- Remove all parts from the rear axle.
- Insert the rear axle and slide through the smaller holes in the vehicle body as shown.
- Center the axle inside the vehicle body.

4. REAR WHEEL ASSEMBLY
- Slide one gear box over one end of the axle, and into the hole in the vehicle body, making sure the motor and motor power wires are inserted into the vehicle body.
- Slide one wheel onto the axle, matching it up with the gear box. You may need to turn and wiggle the wheel as you press it on.
- Slide a Ø12 washer on to the axle.
- Install the M10 locknut.
- Press the axle cap onto the locknut.
- Repeat the above operation for the wheel on other side.
- Using two 17 mm socket wrenches, simultaneously tighten the M10 locknuts. Again, be careful not to over-tighten. Check the threads to confirm that they show on the outside of the nut. Insert the axle cap to finish.

**NOTE:** The two gear boxes are identical, and can be used on either the left or right side.
IMPORTANT! CHECK WHEEL GAP

After assembling any wheel onto the axles, make sure to check the gap between the screw thread and the outside of the wheel (refer to the adjacent diagram). If the gap is too big, add two or three washers on the axle to the inside of the wheel. After tightening the nut on the outside of the wheel, please spin the wheel to check if the wheel spins smoothly. If the wheel gets caught or does not spin smoothly, the friction may cause damage to the motor. Try increasing the gap by removing one or two washers to ensure the wheel spins smoothly.

NOTE: If the wheel nuts are loose, the wheels will not engage the forward gear. Tighten the nut with the socket wrench.

5. STEERING COLUMN ASSEMBLY

• Turn the vehicle on its side as shown in the diagram below.
• Slide a Ø10 washer onto the steering column at front end of vehicle, and then insert the straight end through the hole in the bottom of the vehicle body until it sticks out of the hole on the top of the vehicle body [figure 1 below].
• Insert the bent end of steering column through the hole in the front axle linkage [figure 2 below].
• Fit a Ø10 washer onto the bent end of the column, and insert a split pin into the hole. Use a pair of needle-nose pliers to open and split the pin ends (to assure the washer will not fall out) [figure 3 below].
6. STEERING WHEEL ASSEMBLY

- Turn the vehicle body upright.
- Remove the M5x40 machine screw and M5 nut from the steering wheel with a screwdriver.
- Insert the steering wheel onto the end of the steering column, lining up the hole in the steering wheel and the hole in the steering column. Reinsert the M5x40 machine screw and M5 nut as shown in the drawing at right, and tighten it with a screwdriver.

7. STEERING WHEEL BATTERIES ASSEMBLY

**NOTE:** Batteries are not included.
- Loosen the screw in the steering wheel battery cover and remove the cover.
- Insert 2 x 1.5V size AA batteries as shown.
- Replace the cover and tighten the screw to secure it in place.

STEERING WHEEL BATTERY SAFETY INFORMATION:

Batteries may leak fluids that can cause chemical burn, injury or ruin your product. To avoid battery leakage:

- Install batteries correctly, observing the polarity (+/-) signs to avoid leakage.
- Do not mix old and new batteries.
- Do not mix batteries of different types: alkaline, standard (carbon-zinc) or rechargeable (NiMH).
- Remove the batteries from the battery compartment when the unit will not be used for an extended period of time.
- Always remove exhausted batteries from the battery compartment.
- Do not dispose of batteries in fire.
- Do not short circuit the supply terminals.
- Replace the batteries when the horn sounds become distorted.
- Non-rechargeable batteries should not be recharged.
- Use only batteries of the same or equivalent type as recommended.
- If rechargeable batteries are used, they should only be charged by adult.
- Remove rechargeable batteries from the product before charging.
- Battery chargers used with toys must be examined regularly for damage to the cord, plug, enclosure and other parts. In the event that such damage is found, the toy must not be used with the battery charger until the damage has been repaired.
8. WINDSHIELD ASSEMBLY

- Fit the tabs on the windshield into the slots located at the front of the vehicle and press down to secure.
- Insert four 4x12 round head screws as shown, and tighten with a screwdriver.

9. REAR VIEW MIRROR ASSEMBLY

**NOTE:** Distinguish left and right mirrors for assembly.
- Insert the mirror into the hole in the vehicle body as shown and push until you hear this click into place.
- Repeat for the other side.

10. MOTOR WIRE CONNECTION

- Plug the left and right white motor wire connectors into the white vehicle cable connectors as shown.

11. MOTOR HOOD ASSEMBLY

- Place the motor hood on top of the motor as shown, and secure it with four 4x12 flat head screws.
- Repeat above operation for motor hood on the other side.

**NOTE:** There are two motors to be covered with motor hoods (left and right). DO NOT pinch the wire during assembly of the motor hoods.
12. POWER SUPPLY CONNECTION

NOTE: The battery is disconnected for shipment to prevent the battery from draining.

- Plug the red battery connector into the red control module connector as shown.

13. SEAT ASSEMBLY

- Insert the tabs at the back of the seat into the slots in the vehicle body and press down to secure.
- Tighten two M5x12 machine screws with a screwdriver.

14. REAR FOG-LIGHT RACK ASSEMBLY

- Take out the rear fog-light rack (assembled with one support already) from the bottom of the vehicle body, then fit the unassembled support in the slots of the fog light rack as shown, insert two 4x12 round head screws and tighten them securely with a screwdriver [figure 1].
- Line the rack up with the slots at rear of vehicle body as shown, making sure the fog-lights are facing forward.
- Connect the fog light wire connector to the vehicle wire connector (same colors of connectors to connect, and make sure they are being connected completely) [figure 2].
- Then insert the fog light rack posts into the vehicle body as shown (make sure wires are hidden inside, without kinks) and press down until you hear a “click” sound to ensure the fog light rack is securely attached [figure 3].
15. TAIL LIGHT ASSEMBLY

- Distinguish left and right tail lights, and insert left tail light (marked with “L” on back) into left hole on back of the vehicle body as shown.
- Slide the top two tabs up into the opening, and press the bottom tab in until you hear it click into place.
- Repeat for the other side: Insert right tail light (marked with “R” on back) into right hole and click into place.

BATTERY CHARGING

**IMPORTANT!** Before first time use, charge the battery for at least 18 hours. Charge the battery for at least 12 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.

⚠️ **WARNING:** The battery can fall out and injure a child if the vehicle tips over. Always use the battery retainer.

**PREVENT FIRE**

- Never modify the electrical system.
- Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
- Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
- Use of non-original components on this vehicle could cause overheating, fire or explosion.
- The battery must be handled by adults only.
- The battery is heavy and contains sulfuric acid (electrolyte).
- Dropping the battery could result in serious injury.
- Never allow children to charge the battery.
- Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Read the safety instructions on the battery.
• Never lift or carry the battery by the wires or connector, this can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.

• Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery.

• If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

⚠️ CAUTION: Use the charger in dry locations only.

IMPORTANT NOTE
• The battery must be upright while charging.
• The charger is not a toy.
• Do not short-circuit the battery.
• You do not need to remove the battery from your vehicle to recharge it.
• Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
• Do not charge the battery on a surface (such as a kitchen counter top) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
• Use only an original charger (AC 120V 60Hz) with an output of DC 12V 1A to charge your vehicle battery.

• NOTE TO ADULTS: Regularly examine the charger for damage to the cord, plug, housing or other parts that may result in the risk of fire, electric shock or injury.
• If your battery is old and will not accept a charge, do not leave it in the vehicle. Always remove a dead battery from the vehicle.
• After the first charge, recharge the battery for at least 12 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
• Do not allow the battery to run down completely before charging.
• Charge the battery before storing the vehicle.
• Charge the battery at least once per month, even if the vehicle has not been used.

NOTE:
• This product has CHARGING PROTECTION: when charging, all the functions will be cut off.
• The POWER SWITCH must be switched to the OFF position when charging.
• Recharges after initial charge - Up to 12 hours, and never charge the battery longer than 30 hours.
• When the vehicle begins to run slowly, recharge the battery.

⚠️ WARNING: Use the charger in dry locations only.
1. Plug the charger port into the input socket (the socket is under the seat).
2. Plug the charger plug into a wall outlet. The battery will begin charging.

**NOTE:** Red LED light indicates battery is charging and a green LED light indicates battery is fully charged. (If the lights on the charger do not light up, check the power to the outlets.)
POWER SWITCH
Turn the vehicle on and off.

FOOT PEDAL
To move the 4x4, press the foot pedal down.
To stop, take your foot off the foot pedal.

FORWARD-BACKWARD SHIFT LEVER
To move the 4x4 forward at high speed, shift the lever to “High” position.
To move the 4x4 forward at low speed, shift the lever to “Low” position.
To move the 4x4 backward, shift the lever to “Backward” position.

SOUND BUTTON
Press the sound buttons on the steering wheel to play sounds.
IMPORTANT

• Always stop vehicle when changing the direction to avoid damage to the gears and motor.
• This vehicle has an adjustable seat belt; please instruct children on how to fasten the seat belt before using.
• Do not let any child touch the wheels or be near them when the car is moving.
• To avoid accidents, please inspect the vehicle before riding to ensure that it is in proper working order and safe to ride.
• This toy has no brake; to stop, remove foot from foot pedal.
• Check all the screws, cap nuts and protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
• Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.
• Do not wash the vehicle with water; clean it with a cloth.

SAFETY PRECAUTIONS

• The child must have adult supervision at all times.
• Do not ride on the road, footpaths, near pools, or bodies of water.
• Do not allow children under the recommended age to ride the vehicle; please refer to the age grading.
• Do not allow riders over the recommended weight rating or age grading to use the vehicle.
• To stop the vehicle, you must take your foot off the pedal.
• Charging should only be done by an adult.
• An adult must teach the child how to operate the vehicle.
• Do not ride on hills or slopes, in sand or on other soft, wet, or slippery surfaces.
• Do not use a different size battery. Use only original or recommended replacement batteries.
• The vehicle is designed to carry only maximum weight of 130 lb at a time. Never allow more than two riders or over-load the vehicle.
• This product should be assembled and checked by adults before use.

⚠️ WARNING: No brakes, please do not park or ride on any slopes or steep inclines.
HOW TO REPLACE FRONT WHEELS

1. Remove the axle cap with a flat head screwdriver.
2. Remove the M10 locknut with a 17 mm socket wrench.
3. Remove the Ø12 washer.
4. Remove the wheel, then replace with a new one.
5. Remount the Ø12 washer, M10 locknut and securely tighten the wheel; then re-insert the axle cap.
HOW TO REPLACE THE DRIVING WHEEL AND GEAR BOX

1. Remove the axle cap with a flat head screwdriver.
2. Remove the M10 locknut with a 17 mm socket wrench.
3. Remove the Ø12 washer.
4. Remove the driving wheel.

If you do not need to replace the gear box, please proceed to step 9.
5. Unscrew the screws on the seat with a screwdriver and remove the seat.
6. Unplug the power connector that is connected to the gear box.
7. Remove the gear box and replace with a new one.
8. Plug the power connector back into the gear box.
9. Replace the driving wheel, Ø12 washer, and M10 locknut, and tighten securely.
10. Re-insert the axle cap and secure the seat back onto the vehicle with the screws.

HOW TO REPLACE THE BATTERY

1. Unscrew the screws on the seat with a screwdriver and remove the seat.
2. Use a screwdriver to remove the four screws from the battery cover.
3. Remove the battery.
4. Unplug the power connector (which is connected to the battery).
5. Carefully lift the old battery and replace it with a new one.
6. Replace the battery cover and secure it with the screws. Plug the battery connector into the control module connector, and replace the seat.
**HOW TO REPLACE THE POWER SWITCH**

1. Remove the power switch with a flat head screwdriver (not included).
2. Unplug the main connector from the power switch socket as shown.
3. Plug in the new Power Switch with the power switch socket for replacement.

**HOW TO REPLACE THE FOOT PEDAL**

1. Use a flat head screwdriver to gently pry the LEFT side of foot pedal.
2. Gently remove the foot pedal.
3. Disconnect the old foot pedal from the pedal switch socket.
4. Replace and reconnect the new foot pedal to the pedal switch socket to ensure they are connected in the correct position (see Figure 3) and then reinsert the foot pedal into the foot pedal compartment.
BATTERY CARE AND DISPOSAL

Do not store the battery in temperatures above 75° F (23.5° C) or below 32° F (0° C).

**DISPOSAL:** This product contains sealed lead acid batteries which must be disposed of or recycled in an environmentally safe manner. Do not dispose of the batteries in your household trash. Do not dispose of the batteries in a fire, as the battery may explode or leak. The incineration, disposal in landfill and/or placing sealed lead acid batteries with household trash is prohibited by law in most areas. Return exhausted batteries to a state or federal approved lead acid battery recycler or check with your local retailer of vehicle batteries. If you live in Florida or Minnesota, it is prohibited by law to throw away lead-acid batteries in the municipal waste stream.

⚠️ **WARNING:**

- Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Do not store the battery in temperatures above 75° F (23.5° C) or below 32° F (0° C).
- If a battery leak develops, avoid contact with the leaking acid and place the battery in a plastic bag. See instructions above for proper disposal. If acid comes into contact with skin or eyes, flush with cool water for at least 15 minutes and contact a physician.
- If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information above for proper disposal.
- If acid comes into contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.
- If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

**CARE**

- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.
- Do not store the battery on a surface (such as a kitchen counter top) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you store the battery.
- Do not store the battery in temperatures above 75° F (23.5° C) or below 32° F (0°C).
- Use only a 12V 10AH battery. Remember to charge the new battery for at least 18 hours before first use.
- Prevent the battery from moving freely inside the battery compartment. Always use the battery retainer to secure the battery in the battery compartment.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
MAINTAINING YOUR VEHICLE
Occasionally use a lightweight oil to lubricate moving parts such as wheels and the steering linkages.
Park the vehicle indoors or cover it with a carpet to protect it from wet weather.
Keep the vehicle away from sources of heat, such as stoves and heaters. Plastic parts may melt.
ADULTS ONLY: Recharge the battery after each use. Recharge the battery at least once a month when the vehicle is not being used.
DO NOT wash the vehicle with a hose. DO NOT wash the vehicle with soap and water.
DO NOT drive the vehicle in rainy or snowy weather. Water will damage the motor, electrical system, and battery.
Clean the vehicle with a soft, dry cloth. To restore shine to plastic parts, use a non wax furniture polish. DO NOT use car wax. DO NOT use abrasive cleaners, or cleaners that contain ammonia or isopropyl alcohol.
DO NOT drive the vehicle in loose dirt, sand or fine gravel, which could damage moving parts, motors or the electric system.

⚠️ CAUTION: Charge the battery before storing your vehicle, otherwise the battery will be damaged.

ABOUT FUSES
Your vehicle is equipped with an overcurrent protector and fuse. The protector is a self-resetting safety device which automatically “trips” and shuts down operation of the vehicle if the vehicle is overloaded or the driving conditions are too severe. Once a fuse has “tripped,” SET THE POWER SWITCH TO THE “OFF” POSITION AND DO NOT CONTINUOUSLY PUSH ON THE FOOT PEDAL. The fuse will automatically reset itself after approximately 2 minutes and allow the vehicle to resume normal operations. To avoid repeated automatic shut-downs, do not overload the vehicle by exceeding the 130 lb (59 kg) maximum weight capacity or by towing anything behind the vehicle. Avoid severe driving conditions, such as driving up slopes or running into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motor.

| Vehicle does not run    | Undercharged battery | Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 12 hours after each use. Never charge the battery longer than 30 hours.  
Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall outlet.  
Make sure that there is power flow to the wall outlet. |
| Tripped fuse            |                      | The fuse may “trip” and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions are too severe. Once a fuse has “tripped”, set the power switch to the “OFF” position, release the foot pedal, and wait 2 minutes before operating the vehicle again.  
To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 130 lb maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motor. |
| Electrical switch damage|                      | The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel.             |
| Dead battery            |                      | Check all wires and connectors. Make sure the battery connector is tightly plugged into the control module connector and that there are no loose wires around the motor.  
If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. Replace only with an original 12V 10AH battery. Do not use non-original substitute parts. |
<p>| Motor damage            |                      | Visit the Dynacraft website and replace with a new motor. <a href="http://www.dynacraftwheels.com">www.dynacraftwheels.com</a> |</p>

LIMITED WARRANTY

Subject to the following limitations, all electric ride-on toys manufactured for Dynacraft are warranted to the original purchaser to be free of defects in materials and workmanship for a period of one year from the date of purchase, except with respect to batteries, for which the limited warranty period is six months from the date of purchase.

No other express or implied warranty is given. Dynacraft will replace without charge those component parts that are determined by Dynacraft to be defective in materials or manufacture under normal use and service during the warranty period. The original purchaser will be responsible for any and all labor charges connected with the repair or replacement of component parts.

This Limited Warranty does not apply to normal wear and tear, such as to wheels/tires, cables, or other components that wear with use, nor to claimed defects, malfunctions, or failures that result from abuse, neglect, improper assembly, improper maintenance, lack of maintenance, improper storage alteration, modification, collision, crash, or misuse of the Dynacraft electric ride-on toys.

Dynacraft does not encourage stunting, trick riding, ramp riding, jumping, aggressive riding, riding on severe terrain, riding in severe climates, riding with heavy loads, commercial activities, or other similar activities; such use is inherently dangerous, can cause serious injury to the rider, and if done, it is with the rider and/or the rider’s parent’s express and implied assumption of the risk of such use, and Dynacraft shall not have any responsibility for any resulting break down of the ride-on toy or its components, or for any rider injuries that occur during such use.

Riding an electric ride-on toy can be inherently dangerous such that bodily injury or even death can occur, especially if the rider and/or the rider’s parent does not perform the safety and maintenance checks recommended in this manual, if the rider does not wear a helmet, if the rider does not follow all applicable laws and rules, if the rider goes into traffic, rides double, or engages in aggressive, stunt or extreme terrain riding. Parents that allow their children to ride taking such actions will assume their own risk and the risk of injury to their children, and Dynacraft will not be responsible.

THE PURCHASE OF THIS ELECTRIC RIDE-ON TOY WILL CONFIRM THE BUYER’S AGREEMENT THAT DYNACRAFT’S LIABILITY UNDER THIS WARRANTY SHALL BE NO GREATER THAN THE AMOUNT OF THE ORIGINAL PURCHASE PRICE AND IN NO EVENT SHALL DYNACRAFT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

This Limited Warranty will be void if the product is ever:
- used in a manner other than for recreation or transportation
- modified in anyway
- used as a rental

Dynacraft does not offer an extended warranty; if you have purchased an extended warranty, it must be honored by the store from which you purchased the ride-on toy or the appropriate party. For your records, keep your original sales receipt with this manual.
